

BUILD A SILO-FREE WORKSPACE WITH MICROSOFT DYNAMICS 365 BUSINESS CENTRAL

Microsoft Dynamics 365 Business Central is a comprehensive and robust cloud-based ERP that enables businesses to manage several areas such as project management, operations management, supply chain management and financial reporting while remaining scalable and agile. Business Central gives you centralised access to data and insights allowing you to take informed decisions. Also, Microsoft Dynamics 365 Business Central is an ideal ERP option to switch to, as the tech giant is ceasing support for NAVISION in the coming years.

SEVEN STRONG REASONS TO MOVE FROM MICROSOFT GREAT PLAINS TO MICROSOFT DYNAMICS 365 BUSINESS CENTRAL

Enhanced Accessibility

An internet connection with a strong bandwidth is all you require to access the required information on any device.

Regular Reporting Functionality

Retrieve reports of the required data at the desired intervals to ensure data-driven decisions.

Improved Security

Backed by Microsoft's state-of-the-art security, you can rest assured about the confidentiality of your company's information.

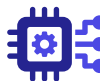

Seamless Adaptability

Business Central is equipped with smooth navigational capabilities and an intuitive interface eliminating the need for extensive user training.

Unparalleled Scalability

Being a cloud-based ERP solution, Microsoft Dynamics 365 Business Central is suited to cater to your evolving needs.

Smooth Integration

As Business Central is a member of the Microsoft family, it can be easily integrated with Microsoft's and third-party productivity solutions.

Frequent Updates

Microsoft releases updates for its solutions on a regular basis to allow you to achieve more with minimum effort.
