Elevate Your Business and Experience the Infinite Possibilities of Azure

Exigo Tech's free cloud migration offer enables you to unlock the power of Azure

Free Migration for your Open-Source Workloads

Azure provides extensive support for Linux virtual machines and open-source databases. We understand that migrating your Linux and open-source databases to Azure can be a task. So, are you ready to take your organisation to new heights in the digital era?

To drive this transition, we are offering a comprehensive migration of Linux and Open-Source Databases to Azure Cloud, **ABSOLUTELY FREE**.

(workloads include any combination of Linux instances, MariaDB, MySQL, PostGreSQL, CosmosDB)

*Azure consumption charges still apply

Unlock Your Potential with Azure

Achieve Efficiency
- Maximize ROI with cloud automation
- Leverage unmatched performance and resilience

Maximise Value
- Reliably control cloud spend
- Optimize workload costs

Innovate with Agility
- Scale seamlessly
- Infuse intelligence to unlock new scenarios

Accelerate your cloud adoption aligned to Microsoft's approach to best practice

Through a series of workshops, we will work with you to:

- Define the strategy for your cloud adoption
- Create an actionable plan to address your Governance and Compliance requirements.
- Migrate the portfolio of workloads to Azure
- Ensure operational success by optimising workload costs, improving your cloud security posture and giving your business access to the flexibility and scalability available to you on Azure
